## Session Objectives

### APA and the Future of Psychiatric Subspecialties

Annelle B. Primm, MD, MPH

*At the end of this session the participant should be able to demonstrate:*

1. Three examples of how the American Psychiatric Association interacts with subspecialty organizations focused on addiction, child and adolescent, forensic, geriatric, psychosomatic and other psychiatric subspecialty areas.
2. Give examples of opportunities for the APA and the subspecialties to collaborate given the Affordable Care Act and healthcare reform, workforce challenges, changing U.S. demographics, and other critical issues confronting the profession with respect to psychiatric care of mental illness and substance use disorders.

### An Update of Pediatric Psychopharmacology

Robert Findling, MD, MBA

*At the end of this session the participant should be able to describe:*

1. New agents and new formulations that have shown to be of potential benefit in youngsters with psychiatric conditions.
2. What is known about the safety profile of new medications that have shown to be of potential benefit for youths with psychiatric disorders.
3. Recent studies of compounds that have failed to demonstrate efficacy in youths with psychiatric conditions.

### Psychosomatic Medicine: Psychiatry's Newest and Oldest Subspecialty

James L. Levenson, MD, DFAPA

*At the end of this session the participant should be able to demonstrate:*

1. Know what characterizes the subspecialty of psychosomatic medicine, how it has evolved, its relationship with consultation-liaison psychiatry, and its importance in the health care system.
2. Recognize the critical role Psychosomatic can play in the evolution of health care into integrated and collaborative care models of care.

### Update on Forensic Psychiatry

Bruce J. Cohen, MD, DFAPA

*At the end of this session the participant should be able to demonstrate:*

1. The breadth of forensic psychiatric practice.
2. How forensic psychiatry differs from general psychiatry.
3. How changes in DSM-5 may affect forensic psychiatry.
4. How innovations in psychiatric genetics and neuroimaging may affect forensic psychiatry.
5. How the shift of psychiatric patients from hospitals to correctional settings affects their care.

### Addictions

George Kolodner, MD, DLFAPA

*At the end of the session, the learner should be able to:*

1. Demonstrate an awareness of current thinking about basic elements of substance use disorders and knowledge about newer developments.

## Overall Objectives

The Psychiatric Society of Virginia's Fall Meeting in Chantilly is entitled "The State of Psychiatric Subspecialties." At the end of this meeting participants will be familiar with APA's collaboration with the various psychiatric subspecialties and the assessment and treatment of patients

## Target Audience

This program was developed for Virginia psychiatrists to address current issues and controversial topics in mental health.

## Accreditation

This activity has been planned and implemented in accordance with the accreditation requirements and policies of the Accreditation Council for Continuing Medical Education through the joint providership of the American Psychiatric Association (APA) and PSV. The APA is accredited by the ACCME to provide continuing medical education for physicians."

## Designation

The APA designates this live activity for a maximum of **5.5 AMA PRA Category 1 Credit™**. Physicians should claim only the credit commensurate with the extent of their participation in the activity.
