New Material from the Vietnam War Indicates the Civilian PTSD Construct Alone Is Misleading When Explaining Psychiatric Casualties in the Theater and Psychosocial Debilitation In Veterans

Norman 'Mike' Camp, M.D.
Clinical Professor of Psychiatry, Virginia Commonwealth University School of Medicine
Fellow of the American College of Psychoanalysts
Colonel, Medical Corps, US Army (Ret)

Objectives:
1. Understand how the analysis of published and unpublished material from Vietnam explodes the myth that the combat there was singularly responsible for the high reported rates for PTSD.
2. Become sensitized regarding the potential for powerful surrounding social and political features to undermine performance in the theater as well as veteran stateside reintegration.

Differential Diagnosis of PTSD Using Psychoanalytic Concepts

Jerome S. Blackman, M.D.
Professor of Clinical Psychiatry, Eastern Virginia Medical School
Distinguished Life Fellow, American Psychiatric Association
Fellow, International Psychoanalytic Association
Supervising & Training Analyst, Contemporary Freudian Society, Washington, D.C.

Objectives:
1. Explicate varying etiologies that present with the same or similar symptoms as PTSD
2. Demonstrate requisite findings to diagnose traumatic and post traumatic dreams
3. Illustrate the common findings in the past history that predispose to PTSD

Post Traumatic Stress Disorder in the Work Place

Benjamin A. Carey, M.D.
CAPT MC USN (retired)
Past Chair of Psychiatry, Naval Medical Center, Portsmouth, VA
Board Certified, Forensic Psychiatry & Addiction Psychiatry

Objectives:
1. Brief review of the history of Post Traumatic Stress Disorder in the military
2. Description of Post Traumatic Stress Disorder caused by industrial injuries
3. Treatment recommendations for industrial related Post Traumatic Stress Disorder

References:
American College of Occupational Medicine. Guidelines to the Treatment of Industrial Injuries
American Psychiatric Association and the Veterans Administration. Recommendations for the use of Eye Movement Desensitization Reprocessing (EMDR) as an adjunct treatment for PTSD
Trauma and Disordered Eating in Military Men and Women

Aileen D. Kim, M.D.
Past Attending Psychiatrist, Bethesda Naval Hospital
Past Director of Psychiatry, Kuwait Naval Medical Station
Consultant, Eating Disorders Center, Washington, DC

Objectives
1. Identify eating disorder risk factors that are unique to military life.
2. Describe ways that disordered eating behavior can be used as a defense in people who have experienced military related trauma.
